Abstract	vi
Published Content and Contributions	vii
Contents	ix
List of Figures	xiv
List of Tables	1
Chapter I: Introduction	1
 I Building blocks of quantum communication networks	 5
Chapter II: Sources and detectors	6
2.1 Sources	6
2.2 Encoding quantum information	11
2.3 Detectors	18
2.4 Heralded single-photon sources	22
2.5 Entanglement distribution	24
2.6 On-chip squeezed light detection	26
2.7 Quantum phased arrays	31
Chapter III: Improving a heralded single-photon source with a photon-number-resolving superconducting nanowire detector	46
3.1 Introduction	46
3.2 Experimental methods	48
3.3 Theoretical model	57
3.4 Results	70
3.5 Discussion	73
Chapter IV: Photon-number-resolving superconducting nanowire array detectors	83
4.1 Introduction	83
4.2 Generalized POVM model for array detectors	84
4.3 Experimental detector tomography	89
4.4 Discussion	95
4.5 Methods	95
Chapter V: High-rate multiplexed entanglement source based on time-bin qubits for advanced quantum networks	104
5.1 Introduction	104
5.2 System	107
5.3 Results	110
5.4 Impact of experimental imperfections	111
5.5 Discussion	120
Chapter VI: On-chip phased array system for non-classical light	127

6.1	Introduction	127
6.2	Quantum phased array theory	128
6.3	Photonic-electronic system	131
6.4	Squeezed light imaging	133
6.5	Reconfigurable free-space links	135
6.6	Discussion and outlook	138
6.7	Methods	139
II	Teleportation systems toward the quantum internet	156
Chapter VII:	The quantum internet	157
7.1	Regional quantum networks	159
7.2	Caltech and Fermilab quantum network testbeds	162
Chapter VIII:	Teleportation systems towards a quantum internet	167
8.1	Introduction	167
8.2	Setup	170
8.3	Experimental results	173
8.4	Analytical model and simulation	181
8.5	Discussion	184
8.6	Methods	186
Chapter IX:	Analytical modeling of real-world photonic quantum teleportation	199
9.1	Introduction	199
9.2	Characteristic function formalism	200
9.3	Analytic expressions of figures-of-merit	203
9.4	Fit of model with experimental results of Chapter 8	208
9.5	Prediction of figures-of-merit under varying experimental conditions	211
9.6	Discussion	218
Chapter X:	Entanglement swapping system toward the quantum internet . . .	223
10.1	Introduction	223
10.2	Setup	225
10.3	Experimental results	228
10.4	Analytical modeling	234
10.5	Discussion	235
10.6	Methods	238
Chapter XI:	Picosecond synchronization systems for quantum networks . . .	257
11.1	Introduction	257
11.2	Picosecond synchronization system	259
11.3	Deployment in a real-world network	264
11.4	Discussion and outlook	270
III	Quantum channels for fundamental physics	275
Chapter XII:	Entanglement and spacetime	276
12.1	Foundations of quantum mechanics	276
12.2	Quantum nature of spacetime	277

Chapter XIII: GHZ states with time-bin qubits	281
13.1 Introduction	281
13.2 Entangling time-bin qubits with a switch	281
13.3 Experiment	283
13.4 Theory	283
13.5 Results	287
Chapter XIV: Teleportation through the wormhole	290
14.1 Introduction	290
14.2 Traversable wormhole teleportation protocol	292
14.3 Experimental implementation	293
14.4 Traversable wormhole dynamics on a quantum processor	298
Chapter XV: Outlook	302
15.1 Future directions	302
15.2 A Bell inequality for traversable wormholes	306

IV Appendices 312

Appendix A: Quantum phased array protocols	313
A.1 Reconfigurable beamsplitter	313
A.2 N00N state generation	313
Appendix B: Statistical analysis of squeezing	315
B.1 Background	315
B.2 Measurement of squeezing	317
B.3 Theoretical model	323
B.4 Estimation of squeezing	326
B.5 Discussion	330
Appendix C: Supplementary information for “An on-phased array system for non-classical light”	333
C.1 On-chip squeezing analysis	333
C.2 Squeezed light source characterization	344
C.3 Measurement characterization	345
C.4 Loss budget	358
Appendix D: On-chip cluster state generation	359
D.1 Experiment	359
D.2 Cluster state inseparability	361
D.3 Discussion	361
Appendix E: Analytical methods for modeling real-world photonic quantum teleportation	364
E.1 Analytical derivations of expressions	364
E.2 Maximum theoretical HOM interference visibilities	368
E.3 Procedure for fitting HOM interference and teleportation fidelity datasets	369
E.4 Calculus of HOM interference visibility expressions	370
E.5 X-basis teleportation curves for varying transmission efficiencies and mean photon numbers	373

Appendix F: Traversable wormhole signatures	374
