

List of Figures

2.1	Effects of Passing Gravitational Waves	8
2.2	Inspiral Waveform	15
3.1	LIGO Schematic	25
3.2	LIGO Noise Budget	27
3.3	Model Control Loop	28
3.4	Euler Angles	31
3.5	Detector Antenna Patterns	34
3.6	Individual Detector Angle-Average Sky Maps	36
3.7	Combined Detector Angle-Average Sky Maps	37
3.8	LIGO Science Runs Timeline	38
6.1	The HIPE Pipeline	63
6.2	Data Preprocessing	68
6.3	Sample Template Bank	69
6.4	Trigscan Example	72
6.5	E-Thinca Tuning	76
6.6	χ^2 Tuning	79
6.7	χ^2 Threshold	80
6.8	r^2 Tuning	81
6.9	Different r^2 Veto Populations	82
6.10	r^2 Sample Time Series	83

6.11	Effects of DQ Vetoes	87
6.12	H1H2 Effective Distance Cut	89
7.1	Effect of Coincidence on Background Trigger Rate	92
7.2	Effect of Amplitude Veto on Background Trigger Rate	93
7.3	Effects of Different Amplitude Vetoes for H1 and H2	94
7.4	Combined ρ_{eff}^2 Distributions for Background Triggers for Different Chirp Mass Bands	96
7.5	Combined ρ_{eff}^2 Distributions for Background Triggers for Different Chirp Mass Bins .	97
7.6	Background IFAR Plots	99
7.7	Combined Background IFAR Plot	101
7.8	Background IFARc Plot	102
7.9	Comparison of Detection Statistics	104
7.10	In-Time IFARc Plot	106
8.1	Postprocessing Pipeline	109
8.2	SEPTIME Example	112
8.3	Background Analyzed Time	114
9.1	Upper Limit Calculation Pipeline	119
10.1	Comparison of Triggers from Loudest Event to an Injected Signal	131
10.2	IFAR Loudest Events	134
10.3	Upper Limits versus Mass	138
12.1	Waveform Inversion	152
12.2	Massive Graviton Bounds	161
13.1	Extreme-kick Configuration	164
13.2	Bobbing Motion in Extreme-kick Configuration	166
13.3	Pretorius' Explanation	166
13.4	Division of Space	169

13.5 Field Momentum Density 176
